

PROMOTE, NETWORK & SOURCE

Malaysia is well-endowed with natural resources in areas such as agriculture, forestry and minerals. It is one of the top exporters of natural rubber and palm oil and has considerable reserves of oil and gas. Rather than developing an economy with a over-dependence on the export of raw materials, Malaysia has managed to diversify its economy to include manufacturing, services, and tourism. Malaysia is Singapore's largest trading partner in 2008 with total trade amounting to S\$111.5 billion, up from S\$109.9 billion in 2007.

- First hand view on prevailing opportunities
- Business updates by the relevant trade officials
